TEYES | CC4 Pro

# Welcome Aboard!

Pro Attitude. Pro Altitude.

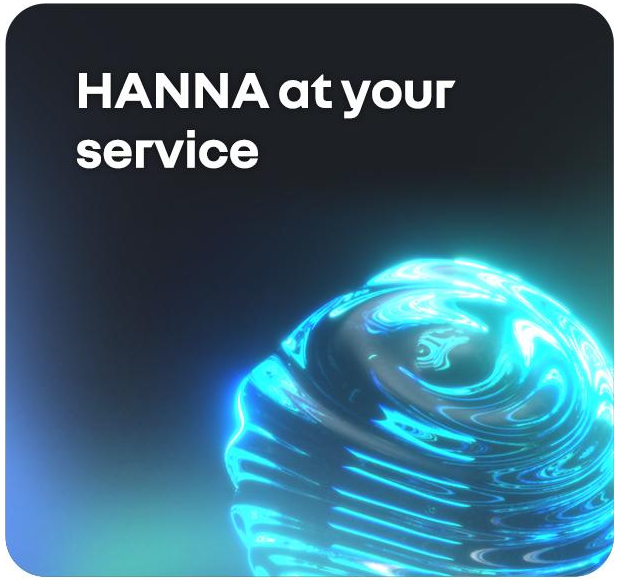

TEYES | CC4 Pro

# Head Unit

# 9.5 / 10.36 inch

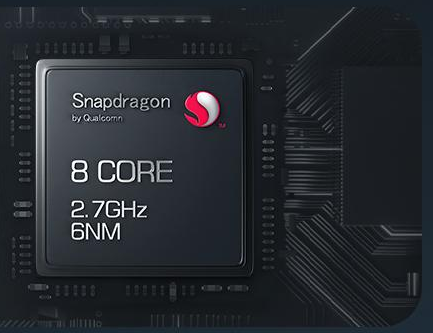

# 7 Major Highlight Features

## 8-Core Chip 2.7G 6nm CPU

Snapdragon by Qualcomm

## DTS Sound Effects

## 3D Driving Assistance

12TOPS NPU

## X-OVER

8-Channel Active Crossover

## Digital Signal Camera

Lossless | Low delay

## Teyes Online

Sentry Mode

## Freestyle Mode

Customizable Combinations

# Proud Cooling Performance

Utilizing advanced Computational Fluid Dynamics (CFD) simulation technology, we have continuously optimized the CC4 PRO's thermal management system. As a result, under rigorous testing at a 2.7 GHz CPU frequency, we achieved outstanding thermal performance—a result we are proud of.

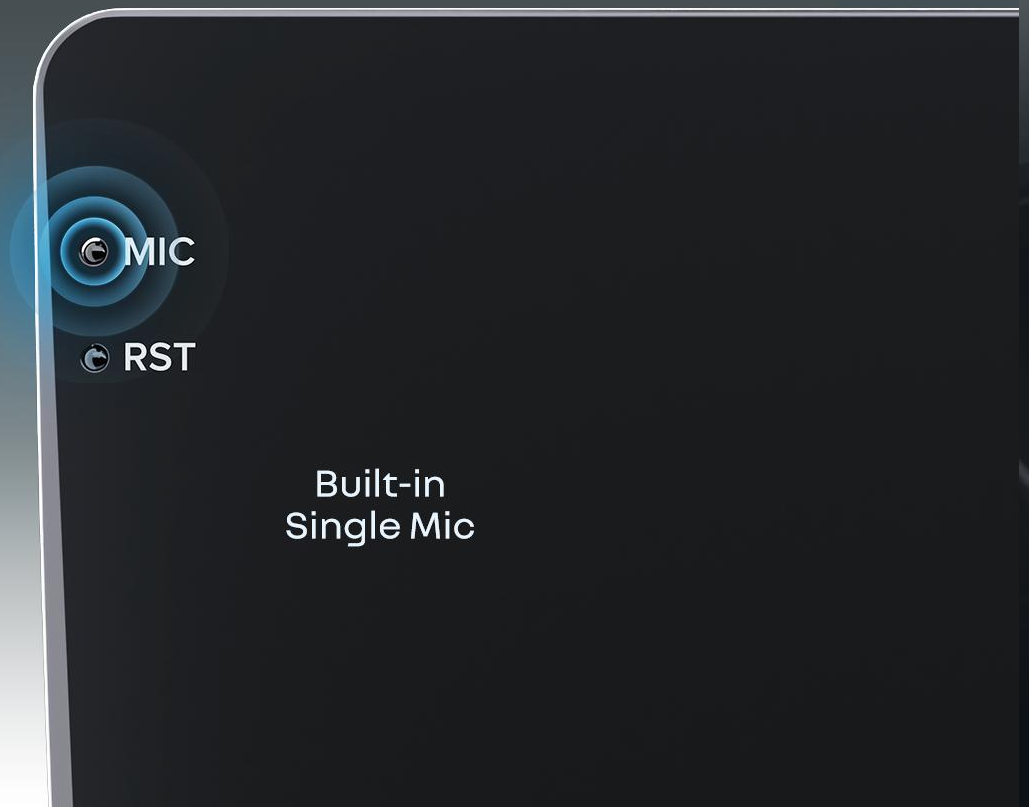

# Digital Microphone

Compared with traditional analog microphones, digital microphones achieve lossless sound transmission, effectively reduce background noise, ensure clear and bright call quality, and significantly enhance voice control recognition. Overall performance has been noticeably improved compared to the previous generation.

Microphone: Built-in | External

When using an external microphone, go to Settings → Sound → Disable Built-in Microphone for optimal performance.

Built-in
Single Mic

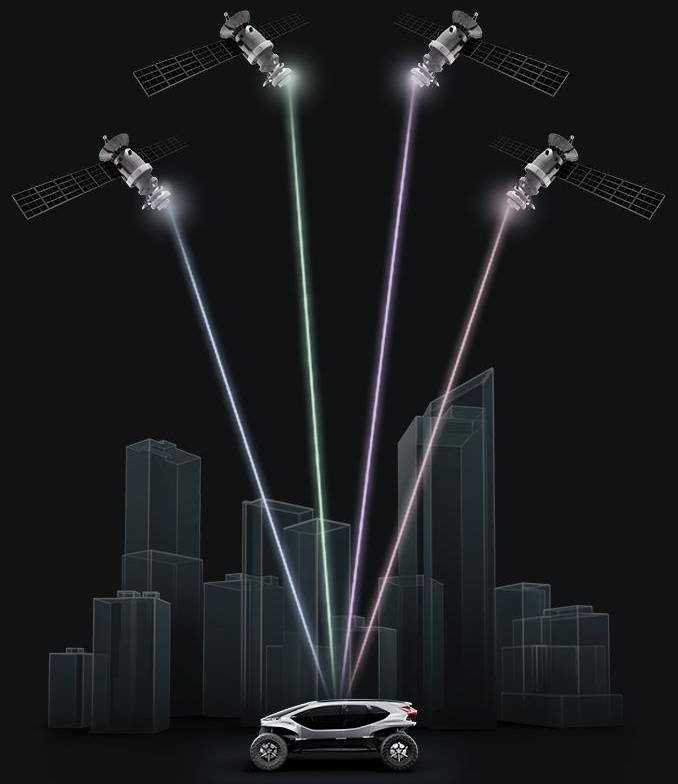

External
Dual Mics

# L1+L5
# More Faster More Accurate

Note: Positioning speed and quantity depend on your antenna installation location.

| L1 | L1+L5 |
| --- | --- |
| Single-Band Antenna | Dual-Band Antenna |
| Satellites 15-30 | Satellites 50-80 |
| Positioning accuracy ranges up to 5-10m | Auto-filtering reduces positioning errors to 1-2m |

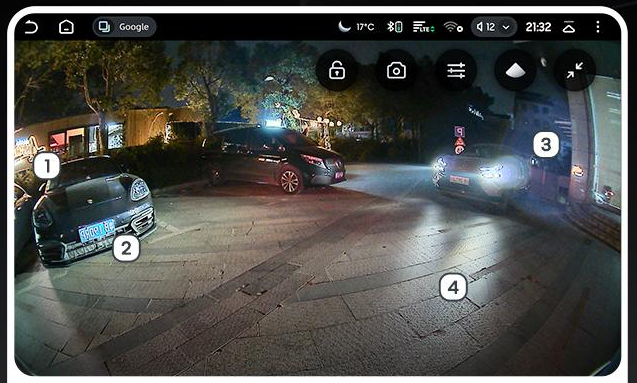

# Digital Camera Experience Unparalleled Digital Imaging

The CC4 PRO supports 6-channel camera inputs (4 digital + 2 analog), allowing each video feed to be saved directly to a USB drive. Whether for 360° surround views or front and rear cameras, it offers the perfect solution. With superior image quality and ultra-low latency, digital signals surpass analog. TEYES leads in digital technology application.

# Safety Intelligence Based on 12T

This marks the aftermarket industry's first implementation of 3D visualization for ADAS data. Our alert strategy is carefully designed to be non-intrusive, ensuring it never feels disruptive. After countless algorithm optimizations, our goal remains simple: to help you avoid even a single accident at a critical moment. To us, that alone makes all the difference.

This is the first product in the vehicle infotainment retrofit industry to feature a visualized ADAS (Advanced Driver Assistance System) warning system.

# Teyes Online Vehicle Protection System

When a 4G SIM card is inserted into the vehicle's infotainment system, it can be remotely awakened via mobile phone, even during extended ignition-off periods. This feature allows users to check the last known location coordinates and access camera feeds. When Sentry Mode is activated, continuous video recording is enabled for added security particularly useful when parked in potentially unsafe areas.

### Attention!

Your privacy. Your rules.
Our technology is built to ensure your personal data stays 100% under your control—secure, private, and just the way it should be.

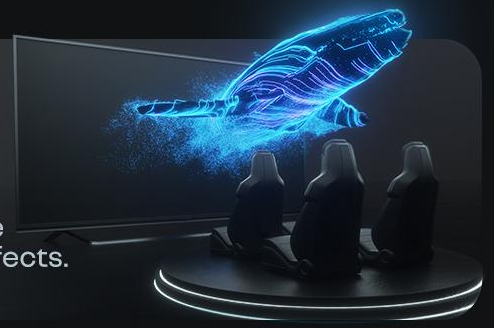

# Immersive Surround Sound Digital Amplifier

dts® Digital Theater Systems

## Cinema Mode

Experience immersive Theater-like sound effects.

## Custom Mode

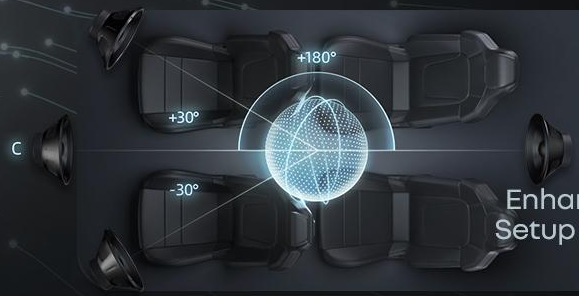

Fine-tune audio with Professional precision algorithms.

## LCRS Surround

Setup for expansive surround sound.

## MONO surround

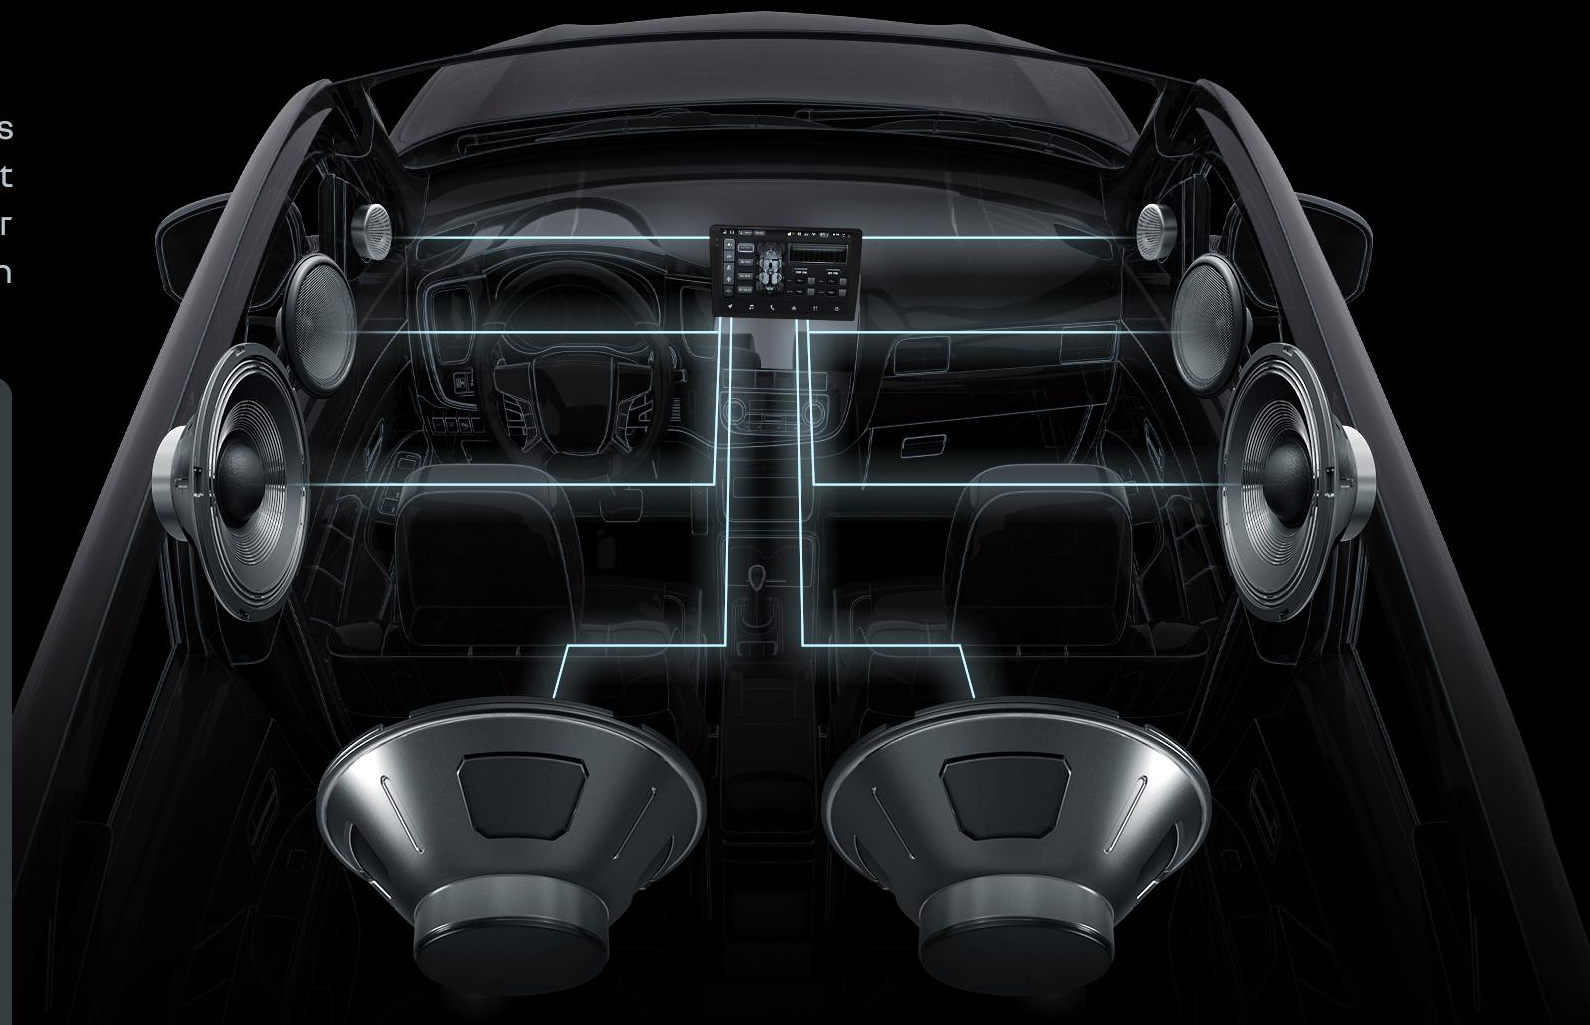

Enhanced surround sound Setup for clarity and depth.

# Active three-way 8 channel output

Ideal for car audio enthusiasts, this feature eliminates the need for an external audio mixer. Enjoy independent control over sound frequency output for each speaker directly through your car's HU interface, saving on costs and enhancing customization.

# HANNA at your service

Hanna AI Edition is moving quickly through development and is expected to launch later this year. It's designed to completely change how we experience smart car infotainment.

# Efficient Interaction Hyper Smooth!

Experience the pinnacle of efficiency in interaction. Easily access any app with a single touch across all interfaces. Simplifying automotive systems is our aim, reflected consistently in the CC4 PRO.

# Music or Radio?
# Just One Touch

Easily switch between all primary audio sources
with a single tap for seamless enjoyment.
